LI-EX LED Profile

Individual and Flexible

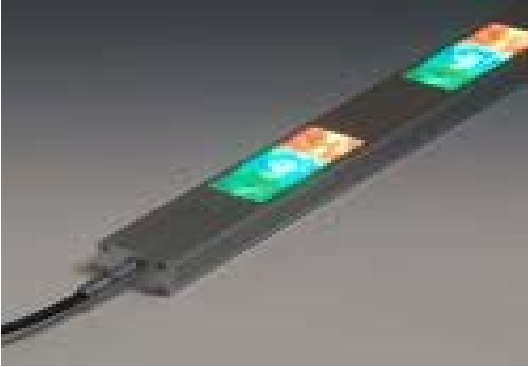

The LI-EX Profile is a patent extruded aluminium sheath system, which can be used for linear high-Power LED systems, manufactured individually for the application / project. Each length (up to 3m) is possible and all kind of LED-pitches, with RGB or one colour modules, in different optics. High flexible and customised assambly.

Fields of application: (listing)

- facade illumination
- Wallwasher Line
- pendant luminaire
- background lighting
- counter and rack illumination

Benefits: (listing)

- Profile length up to 3 m feasible
- free selectable LED-pitch possible
- RGB or one colour light fixture
- Optics: 10°, 30°, 60°, 10° x 50 °
- customer and project-specific assembly
- optimised heat conduction
- Dimension just 32 x 22 mm
- 3 different surfaces: anodised aluminium, black and brush-finished
